

Develop A Python Script

| | |
|--------------|---|
| Team ID | PNT2022TMID26604 |
| Project Name | Smart Waste Management System for Metropolitan cities |

Steps involved:

Step 1: Open python idle

Step 2: Type the program

Step 3: Then click on file and save the document

Step 4: Then click on Run then Run Module

Step 5: output will be appeared in the idle window

Python Script :

```
import requests
import json
import ibmiotf.application
import ibmiotf.device
import time
import random
import sys

# watson device details

organization = "RMK Engineering College"
devicType = "NodeMCU"
deviceId = "4076"
authMethod= "token"
authToken= "zs4P1axSjkUg+0QG-("

#generate random values for randomo variables (temperature&humidity)

def myCommandCallback(cmd):
    global a
    print("command recieved:%s" %cmd.data['command'])control=cmd.data['command']
    print(control)
```

```

try:
